

U CONNECT

The Professional Plug & Play Lighting System

U CONNECT

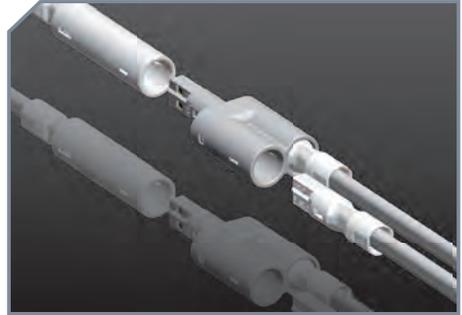

The Greenstock Lamp Company knows that the lighting industry is always changing, that's why we have evolved over time, and constantly worked to improve our products to ensure that we meet and exceed your expectations.

As a result, Greenstock are proud to introduce our U-Connect plug and play lighting range.

U-Connect is an innovative new wiring system, making lighting systems extremely easy to install and enabling the user to keep building onto the existing installation with a wide range of accessories.

Uses range from the domestic customer through to professional retail, commercial and specialist applications.

U-Connect is perfect for quick and easy installs with full support available from our technical sales team.

- Expand the power system and easily split power for two lamps
- Splitter has the function to switch power
- LEDs can be placed in series using a splitter

The U-Connect system uses a unique connector system which locks in place once the connections are made. This eliminates the need for soldering, electrical knowledge or experience within the (electrical) market.

A true plug and play system should allow the end user to be up and running in seconds with minimum fuss, and 100% accuracy, Greenstock's system achieves just that. The creative possibilities of Greenstock's plug and play system are

almost limitless with the use of its innovative UK manufactured U-Connect system.

Our full range of accessories for the U-Connect wiring system creates an extremely easy to install process, and enables the user to keep building onto the existing installation providing a wide range of possibilities. Durable yet slim line in build, our accessories use less space, less energy and have an unmistakable design.

Easy. Fast. Compact.

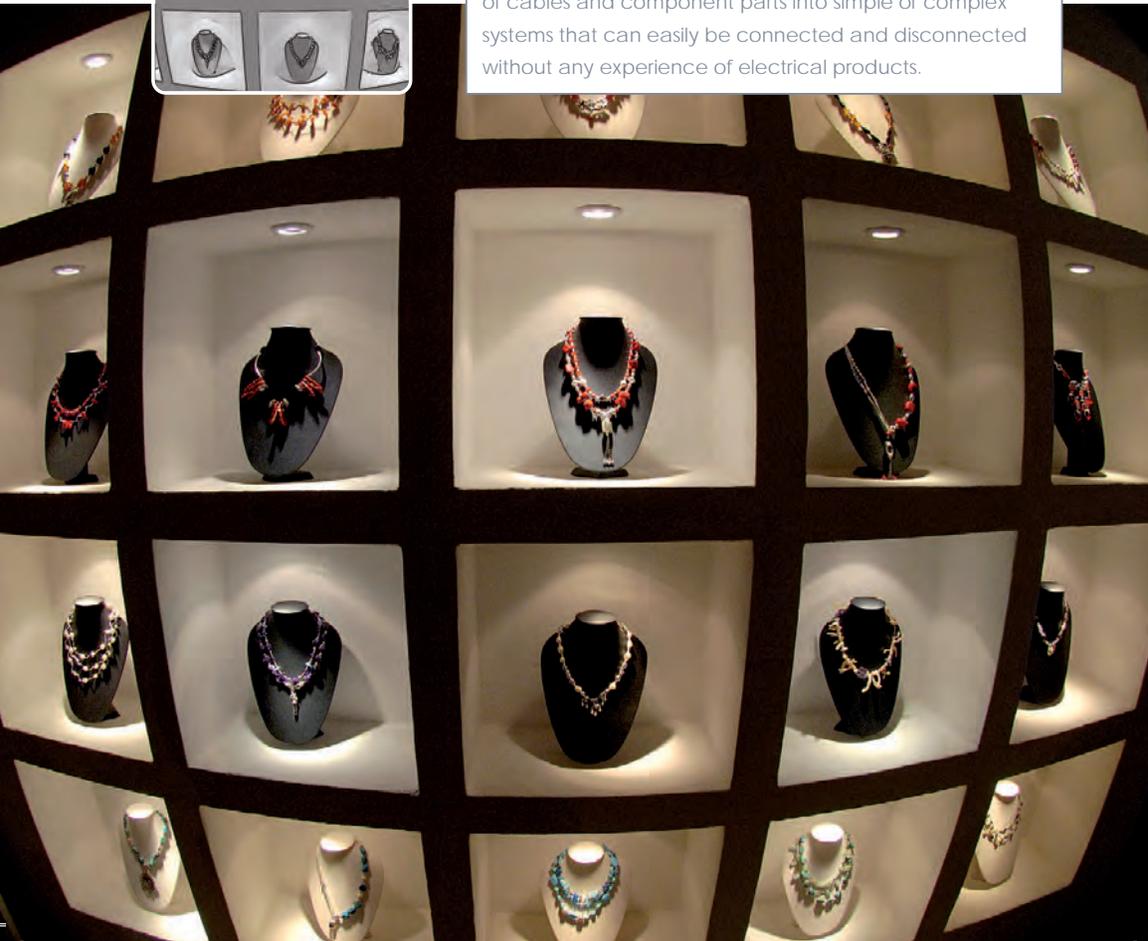

It's our job to make lighting connectors easy to use and fast to implement. The compact U-Connect system allows you to think freely with your lighting design as its flexibility enables you to move fixtures around product displays for optimum lighting without worrying about any practical implications.

Our connectors can make your lighting visualizations a reality.

U-connect can be used to improve your lighting range to create limitless lighting possibilities, in both commercial & domestic environments. Our U-Connect range continues to expand, and constantly offers new products and uses to the end user.

The U-Connect system works by interconnecting a range of cables and component parts into simple or complex systems that can easily be connected and disconnected without any experience of electrical products.

Lighting solutions that increase sales.

Products need to stand out

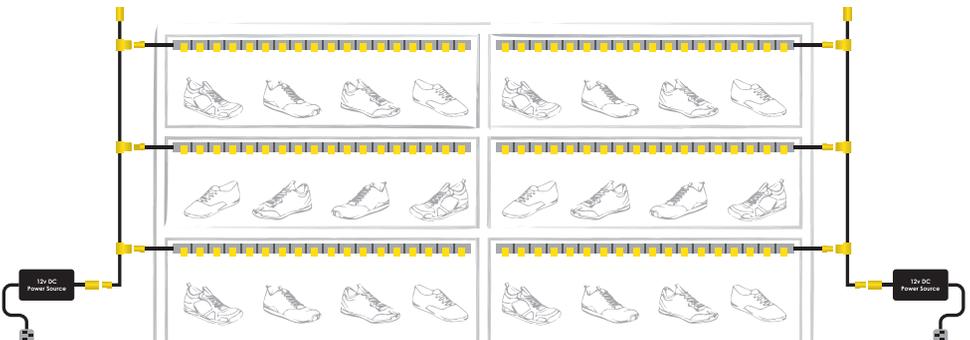

Every product deserves the best presentation possible. Not only in a photograph used for an advertisement, but in its display at a store, a product fair, or in the reseller's showroom. Lighting featured in such product presentations should showcase the product in the most optimal way.

→ **THE PROBLEM** : An unreliable lighting connection can lead to light failure, which in turn can lead to poor product presentation.

→ **OUR SOLUTION** : A reliable lighting fixture with a proven connector system.

→ **THE END RESULT** : A flexible, high-quality fixture that provides more value through an integrated connector system.

We can make your product stand out. Now you can have a plug-and-play interconnection system that easily conducts power anywhere. With U-Connect, you are no longer limited by the size and shape of a connector. The small, smart wiring solution can make the presentation of any product outstanding.

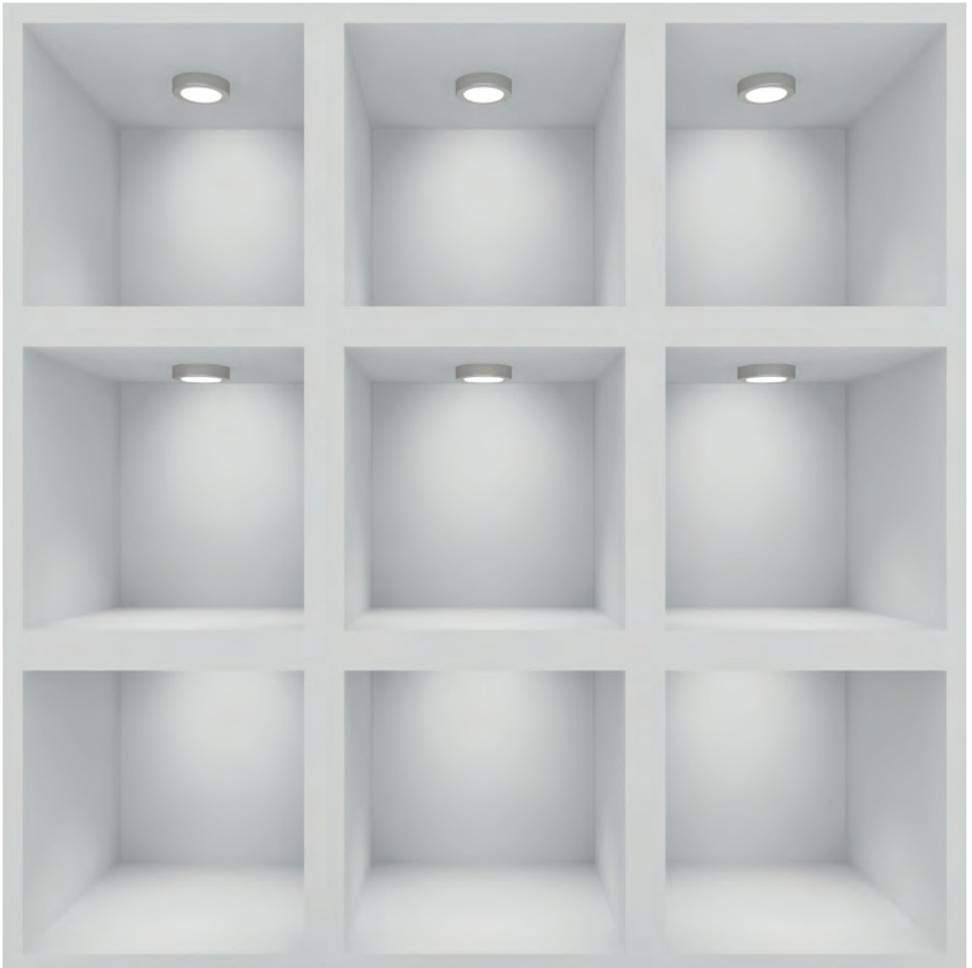

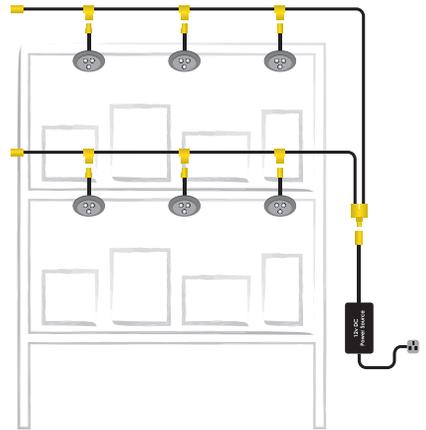

It's the little things...

The overall atmosphere of any interior lighting design can change because of a 7.5mm connector.

Using the U-Connect system to supply your lighting scheme through such a small space, your lighting possibilities are transformed. Those few millimetres can give you unparalleled freedom to power your lights.

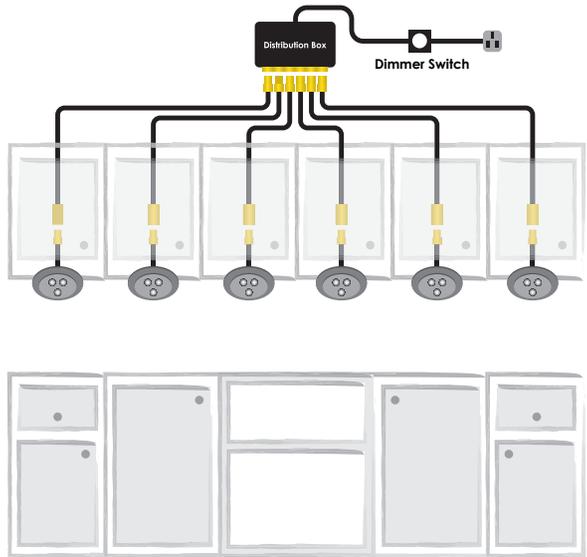

Whether it is 12V or 24V, the plug-and-play connector can expand a lighting system beyond its wall outlet.

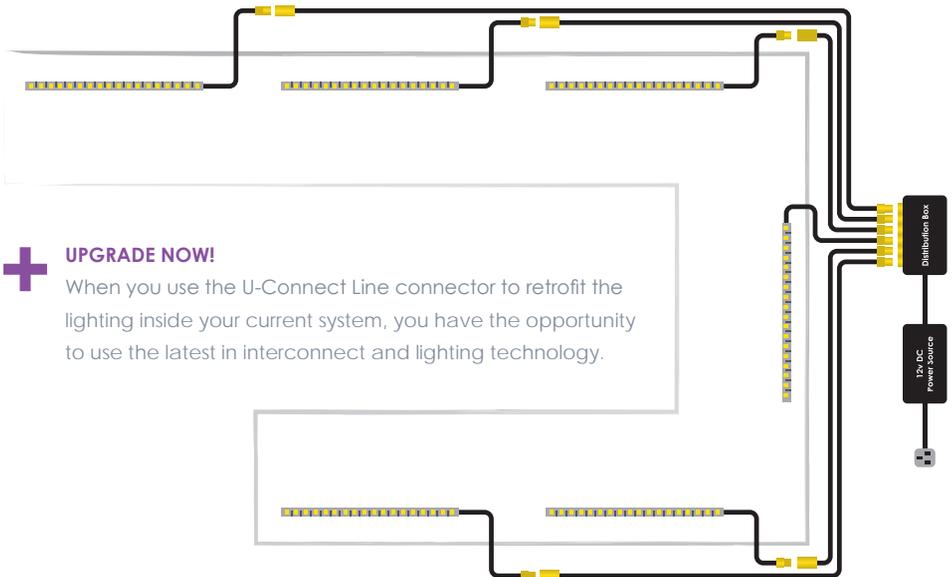

Flexible solutions with every design.

The creative use of light sources

Every interior designer knows what proper lighting can do to a room, a desk or a cabinet. It can set a room's ambiance, tone a wall color, or apply an accent on just the right spot. Your wiring can be just as flexible as your imagination. All of your lights can be controlled using our range of dimmers which all work perfectly with the U-Connect system.

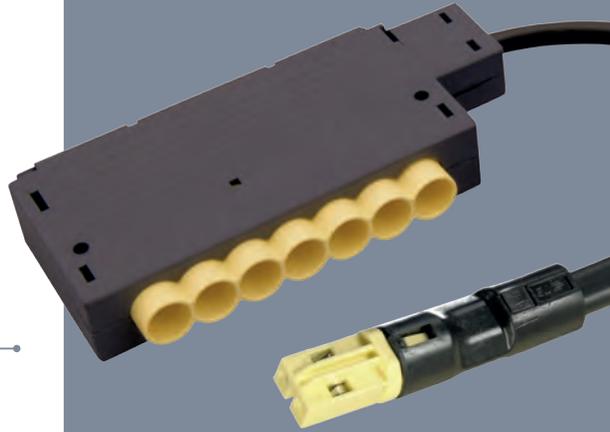

UPGRADE NOW!

When you use the U-Connect Line connector to retrofit the lighting inside your current system, you have the opportunity to use the latest in interconnect and lighting technology.

Our range of accessories consist of the following:

U-Connect Drivers

We have a full range of U-Connect drivers from 6W with single outputs through to dual output 150w IP67 drivers. All are pre-installed with the U-Connect system and mains plugs so they are ready to use as soon as they arrive. The drivers have a single output cable fitted for the U-Connect system which can also be purchased separately meaning that you can convert most existing drivers to work with our system.

Distribution Boxes

Our 6 way distribution box is supplied with a 500mm LSF cable and a male U-Connect fitting to enable it to be up and running in no time. The distribution box enables multiple products to run from one power source and can be fixed to an area using screw holes within the housing itself.

Y Splitter

This enables the connection of two lighting products from one power source or can be used to direct power in opposite directions for multiple light schemes.

Single Output Cable

Our single output leads are supplied in 150mm lengths and are used to directly connect from the driver/power source to our range of LED lighting products. These can be purchased separately to use with an existing driver to convert to the U-Connect system.

LED Snap clips with plug

Our range of 10mm and 8mm snap clip adapters are all available with the plug and play system connectors meaning that you can attach your professional grade LED tape from Greenstock to your lighting system without the need of soldering experience or electrical knowledge. Available in cable lengths of either 150mm or 500mm these are a vital part of the system.

Spider cables

Available with a range of 3 outputs over 1 metre of cable and 5 outputs over a 2 metre cable. Spider cables can be used for multiple outlets of power within one space.

Extension Leads

Our U-Connect extension leads are available in lengths from 0.5 to 5 metres and these leads enable flexible positioning of the lights in relation to the power source. All extension leads are terminated with 1 male connector and 1 female connector.

LED Strips & Lights

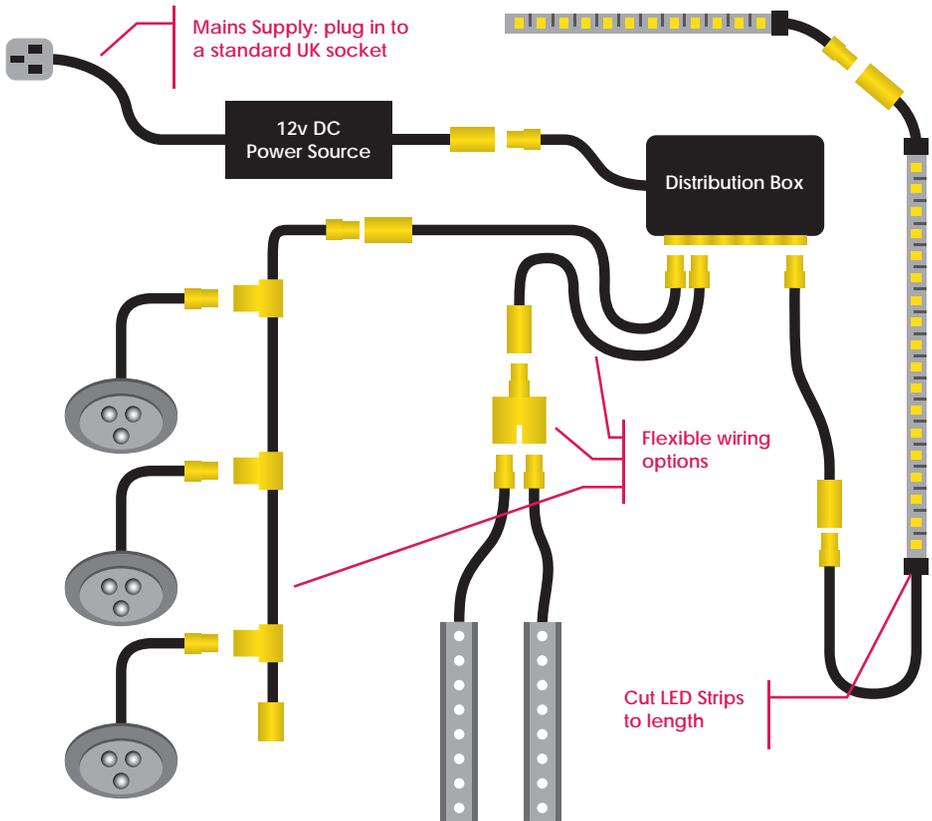

With a choice of professional grade LED flexible Strip, under cabinet lighting, LED downlights and spotlights, our range is perfectly matched to our U-Connect system. Supplied with the connectors installed and ready to use immediately, your lighting needs are up and running in minutes.

Controllers

To control our range of lighting products we have a full controller offering consisting of inline dimmers and remote controls. All available with the U-Connect plug system, these controllers are the perfect accessory to finish your installation and give you the effects you require.

An example of our system...

Greenstock's U-Connect system can significantly reduce the cost and complexity of customers lighting installations, and offers limitless lighting applications for home, office, retail or display applications. A unique, cost effective system, U-Connect accessories are the perfect addition to make full use of our fantastic range of LED Strip lights. U-Connect products are essential to expand your lighting possibilities and with an easy to use connection system, just plug in and switch on.

...just give us 8mm

If you give us an opening as little as 8mm, the U-Connect Line connector can fit there. You can power your lights just about anywhere: in a cabinet, inside kitchen furniture or in a headboard. The connector is easy to use, fast to implement and small enough to fit almost anywhere.
